SUMMARY

Senior Data Engineer with 4+ years of experience designing robust ETL/ELT pipelines and medallion architectures on GCP and Databricks. Expertise in BigQuery data modeling, quality frameworks, complex JSON transformations, and metadata management. Proven track record collaborating with analytics and engineering teams to deliver high-quality, compliant data solutions across healthcare, procurement, and retail domains.

PROFESSIONAL EXPERIENCE

Wellsky | *Senior Data Engineer, Health Care*

Jun 2025 - Present

- Architected medallion architecture pipelines for data ingestion, migrating Firestore NoSQL to BigQuery using Dataform, processing 10+ clinical custom forms with complex JSON data transformations
- Built reusable data governance and validation framework ensuring schema integrity, primary key uniqueness, and referential validation across 50+ data models with automated quality checks
- Developed dimensional data modeling and data flattening patterns to pivot dynamic custom form fields into analyst-friendly columnar format for care coordination workflows
- Implemented time-windowed product extracts with timezone-aware filtering capturing 24-hour operational snapshots while handling HIPAA-compliant PII data with role-based access controls.
- Optimized BigQuery joins and queries for deduplication and priority-based lookups reducing query costs by 30%

RNTBCI | *Senior Data Engineer, Procurement*

Mar 2024 - Jun 2025

- Led data profiling and Buyer Data Migration Project transforming 600M+ records in BigQuery
- Built pipelines across Transit → Raw → Gold Zones in GCP.
- Migrated datasets between BigQuery and PostgreSQL.
- Automated data transfers using Cloud Functions integrated into CI/CD pipelines
- Collaborated with Spotfire & Looker teams for BI enablement.

LTI Mindtree | *Data Engineer, Retail*

Apr 2021 - Mar 2024

- Built ETL pipelines integrating AWS S3, GCP Warehouse, UI Sheets.
- Performed transformations using SQL in Databricks & BigQuery.
- Designed KPI calculations in Core Java.
- Acted as bridge between data ingestion and Power BI teams.
- Optimized BigQuery pipelines for scalable reporting.

Bigbinary | *Intern, Health Care*

Oct 2020 - Apr 2021

SKILLS

- **Data Engineering & Management:** Dataform, Databricks, Apache NiFi, Medallion Architecture (Bronze-Silver-Gold), ETL/ELT Pipelines, JSON Data Processing, Real-time Data Streaming, Data Modeling, Data Profiling, Data Acquisition, Data Ingestion, Metadata Management, Data Lineage, Data Governance, Data Lifecycle Management, Entity Relationship Diagrams, Dimensional Data Modeling
- **Databases:** BigQuery, MYSQL, DynamoDB, Firestore (NoSQL), SQL Server
- **Cloud Platforms:** GCP: BigQuery, Dataform, Firestore, Cloud Functions, Cloud Storage (GCS), Cloud Composer, Dataflow, Pub/Sub, Cloud Build, Artifact Registry, Cloud Logging, Cloud Monitoring, IAM, AWS: S3, EC2
- **Programming Languages:** Core Java, Python (Basics), SQL (Advanced - CTEs, Window Functions, JSON parsing), JavaScript (UDFs)
- **Infrastructure as Code & CI/CD:** Terraform, Spacelift, Docker, Git, Bitbucket, Cloud Build, CI/CD Pipelines, Jira, Confluence, Source Code Management, Continuous Integration, Continuous Deployment
- **Analytics & BI Tools:** Spotfire, Sisense, Databricks
- **Data Quality & Validation:** Custom validation frameworks, Schema validation, Automated data quality testing
- **Security & Compliance:** HIPAA compliance, PII data handling, Security Coding Practices

EDUCATION

East West Institute Of Technology VTU

Aug 2016 - Oct 2020

Bachelor of Science, Computer Science

CERTIFICATIONS

- Google Cloud Professional Data Engineer
- Databricks Lakehouse Fundamentals
- Google Cloud Associate Cloud Engineer
- Advanced SQL
